DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to a vaccine formulation comprising an immunogen, a preservative, and an excipient, classified in class 424, subclass 184.1.
 - II. Claims 9-12, drawn to a base stock solution comprising a preservative, classified in class 436, subclass 18.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are expected to have different effects. The vaccine of Group I is required to treat or prevent infection, whereas, the base stock of Group II is a diluent that has no preventative property.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper. In addition, a search for Group I is not required for Group II.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
